COOK

VISION COOK

De Vision Cook is uitgerust met zowel een bakoven en een kooksectie. U kunt beide functies ook gelijktijdig gebruiken.

Wilt u enkel de kooksectie verhitten? U kunt er dan ook voor kiezen om vuur te stoken in het bak gedeelte en zo de kookplaat te verwarmen.

The Vision Cook is equipped with both a baking oven and a cooking section. You can also use both functions at the same time.

Do you only want to heat the cooking section? Then you can also choose to light a fire in the baking section to heat the cooking plate.

Vision Cook è dotata di un forno e di un piano cottura. È possibile sfruttare entrambe le funzionalità allo stesso tempo.

Desiderate riscaldare solo il piano di cottura? In tal caso, potete anche decidere di accendere un fuoco nel forno per scaldare solo la piastra.

Der Vision Cook ist mit einem Backofen und einem Kochbereich ausgestattet. Sie können auch beide Funktionen gleichzeitig bedienen.

Möchten Sie nur das Kochteil beheizen? Dann können Sie auch ein Feuer im Backfach entzünden, um die Kochplatte zu erhitzen.

BAKOVEN

BAKE OVEN
FORNO A LEGNA
BACKOFEN

Een pizza of ovenschotel bereiden in uw haard? Kies één van onze prachtige speksteenkachels die is uitgevoerd met bakoven. Terwijl u geniet van heerlijke warmte en het vlammenspel wordt uw maaltijd op houtvuur bereid.

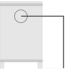

Preparing a pizza or oven dish in your stove? Choose one of our beautiful soapstone stoves equipped with a baking oven. While you enjoy wonderful warmth and the play of flames, your meal is being prepared on a wood fire.

Desiderate cuocere una pizza o un piatto delizioso nel vostro forno? Optate per una delle nostre splendide stufe in pietra ollare con forno integrato. Mentre vi godete il relax, immersi nel fantastico calore, guardando danzare le fiamme, la vostra gustosa ricetta prenderà forma.

In Ihrem Holzofen eine Pizza backen oder einen Auflauf zubereiten? Nehmen Sie einen unserer schönen Specksteinöfen, die mit einem Backofen ausgestattet sind. Während Sie die herrliche Wärme und die Flammen genießen, wird Ihr Essen auf dem Holzfeuer zubereitet.

DÉ SPEKSTEEN PELLETKACHELS VAN ALTECH

De Altech speksteenkachels branden op houtpellets en werken niet geautomatiseerd zoals een doorsnee pelletkachel, maar met een micro-vergassingssysteem.

Deze gepatenteerde techniek zorgt voor een schone verbranding en een zeer hoog rendement. De Altech pelletkachels functioneren (net als de speksteen houtkachels) op verse lucht en de natuurlijke trek in het rookkanaal. Dit stroomloze verbrandingssysteem zorgt ervoor dat er geen ventilatoren nodig zijn. U heeft dus geen last van geluid of storingen. En dankzij het unieke verbrandingssysteem realiseren de Altech pelletkachels een hoog rendement en een minimaal pellet verbruik.

Ontdek de speksteen pelletkachels van Altech én de vele voordelen zelf.

THE SOAPSTONE PELLET STOVES FROM ALTECH

The Soapstone stoves from Altech burn wood pellets and, unlike conventional pellet stoves, they are not automated. Instead, they use a micro-gasification system.

This patented technology offers clean combustion and very high efficiency. The Altech pellet stoves (like the soapstone wood-burning stoves) use oxygen from the space they are in and the natural airflow of the flue. This electricity-free combustion system means no fans are required. As a result, you won't have to deal with noise or malfunctions. Thanks to the unique combustion system, the Altech pellet stoves offer high efficiency and minimum pellet consumption.

Discover the soapstone pellet stoves and the many benefits they offer yourself.

DIE SPECKSTEIN-PELLETÖFEN VON ALTECH

Die Altech Specksteinöfen arbeiten mit Holzpellets und nicht automatisiert wie ein herkömmlicher Pelletofen, sondern mit einem Mikrovergasungssystem.

Diese patentierte Technik bietet eine saubere Verbrennung und eine sehr hohe Effizienz. Die Altech Pelletöfen funktionieren (genau wie die Specksteinholzöfen) mit verfügbarem Sauerstoff und dem natürlichen Luftzug im Schornstein. Mit diesem Stromlosen Verbrennungssystem werden keine Ventilatoren benötigt. So sind nervige Geräusche oder Störungen Geschichte. Und dank des einzigartigen Verbrennungssystems erzielen die Altech Pelletöfen eine hohe Effizienz und gleichzeitig einen minimalen Pellet verbrauch.

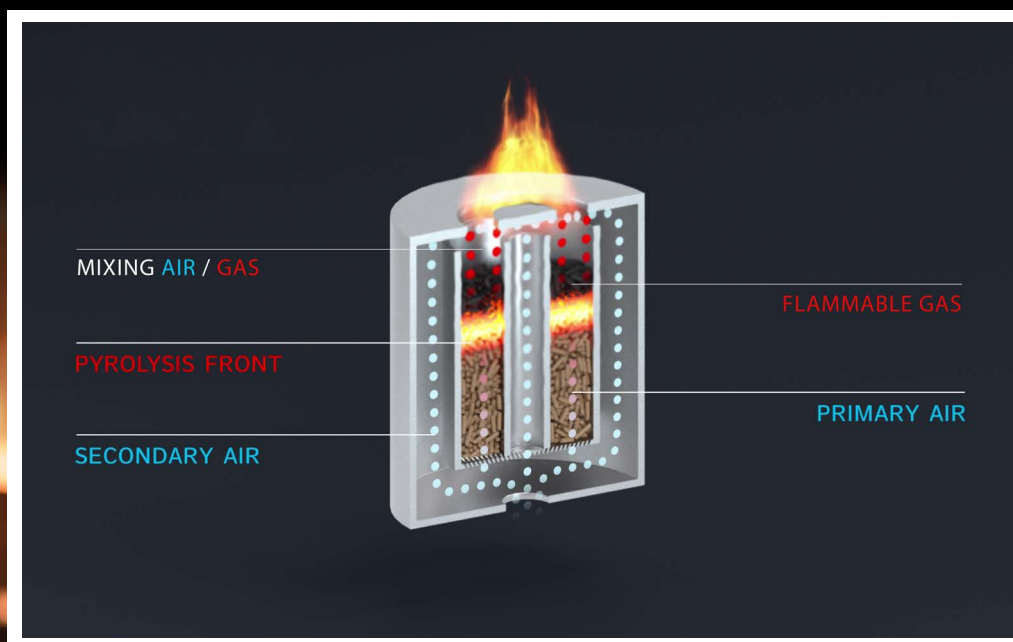

Entdecken Sie selbst die Speckstein Pelletöfen von Altech und die vielen Vorteile.

LE STUFE IN PIETRA OLLARE A PELLETT DI ALTECH

Le stufe in pietra ollare Altech possono funzionare anche a pellet: a differenza delle tradizionali stufe a pellet, non sono automatizzate, ma sfruttano un sistema di micro-gassificazione.

Questa tecnologia brevettata consente una combustione pulita e un'elevata efficienza. Le stufe a pellet Altech utilizzano l'ossigeno presente nell'ambiente e il flusso d'aria naturale della canna fumaria. Grazie a questo sistema di combustione privo di elettricità, non sono necessarie ventole. Di conseguenza, non dovrete preoccuparvi di rumori o malfunzionamenti. Con il loro esclusivo sistema di combustione, le stufe a pellet Altech garantiscono un'eccellente efficienza e un consumo ridotto di pellet.

Scoprite voi stessi le stufe a pellet in pietra ollare e tutti i vantaggi che possono offrire.
